

INTERLINKED PITCH BOOK · AUTHORED BY THE CREW

Story Agent

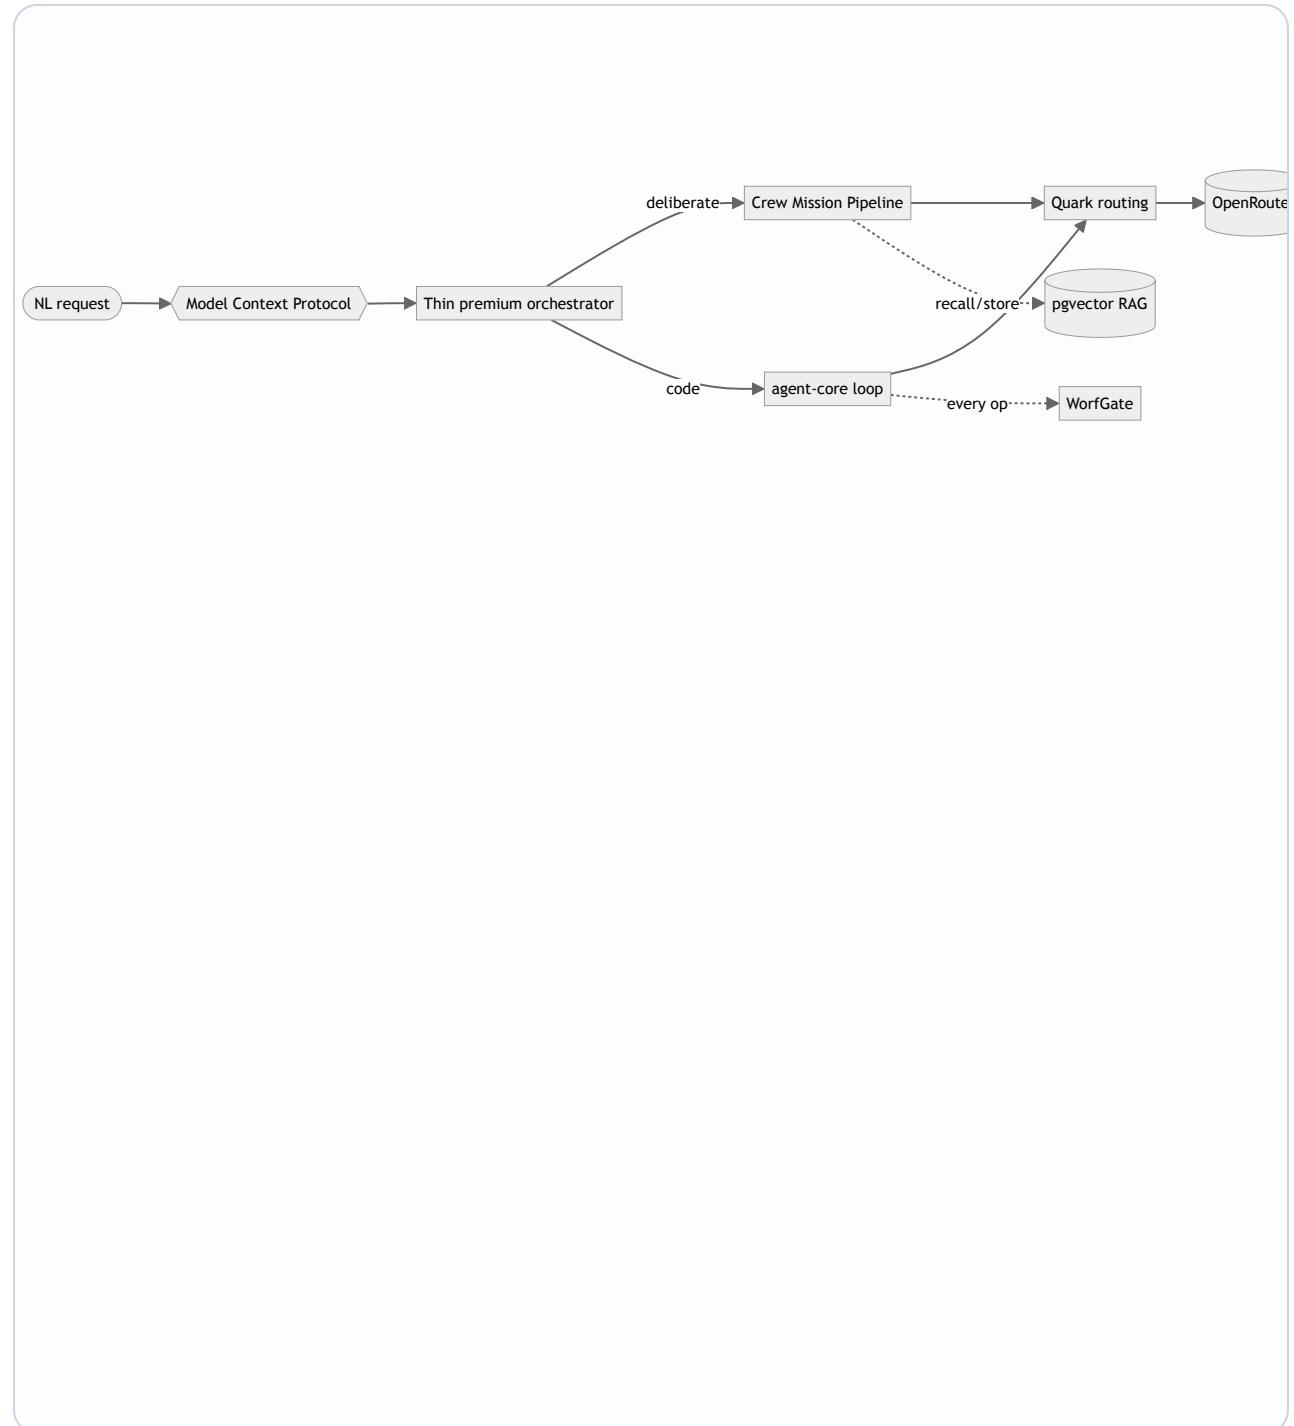

An 11-agent crew that keeps the expensive model **thin** — pitched from the top level down.

Riker assembled a team per pillar; the teams committed, then split into parallel execution on cost-optimized OpenRouter models.

THE SYSTEM, TOP DOWN

How it works, in one picture

The whole control flow. Each pillar below zooms into one part of this.

CONTENTS

Pillars — pick a thread

This is the directory. On a shared screen, click a pillar to drill in; the pillar deck links back here.

- 6 · **Infrastructure & Operations** — [HTML](#) · [PDF](#)

Each pillar is its own crew-authored deck; links open the drill-down. In the PDF, the PDF links open the sibling pillar PDFs.

CLOSE

Keep the expensive model thin; make the cost of every decision visible.

It runs today; the bar for full autonomy is defined and honest.
